Re: Maria Pit Overburden Dump Pile/Crushing Operation

Dear Tom:

Enclosed is the NOI for the road base crushing operation located on the Maria mine dump which is all previously disturbed from a prior mining operation. The application is in the name of Gene Henrie, dba Quality Crushing, who has been contracted by Western Utah Copper Co. to crush approximately 100,000 ton of road base for the mining operation. I have put this application together from his operation.

The original crushing location was at the Hidden Treasure overburden pile next to the main road leading to the overburden pile. The quartzite rock was so hard that we chose to move him to the Bawana overburden pile that was a softer limestone. A visit by Ed Ginouves found that he was set up on BLM property which created the problems with the permitting. Hopefully you will approve this new location as it is entirely on the Candy "C" patented mining claim on previously disturbed land with existing roads leading to and from the mine dump.

Mapping and additional information is also enclosed to supplement the application along with the required fee. Please review for its completeness.

Thank you.

Ronald J. Wunderlich  
Western Utah Copper Co.
